Dear Sutton Community Members,

We are writing to share an important update regarding the Springdale Solar Farm project, located at Tallagandra Lane, Sutton, NSW.

Flow Power are an Australian renewable energy retailer and developer who acquired the project from the former developer, RES Australia. As part of our processes to assess the viability of the project, further technical studies were undertaken in 2025.

Following this additional work, Flow Power have concluded that we will not be moving forward with the project.

Based on our discussions with RES Australia, we are aware that community members were engaged at length by the previous developers over the years, and that community members invested significant time in participating in these engagements. Because of this, we made a conscious decision to first assess the project's viability before more meaningful engagement.

If you have any questions about this update, please feel free to reach out to our team on 1300 08 06 08. Thank you for your time and attention.

Best Regards,

The Flow Power Team
